RAHUL PATIL

FLUTTER DEVELOPER

9904251895 | rahuldpatil505@gmail.com | Rahul Patil | Ahmedabad

PROFILE SUMMARY

Flutter Developer with 2.5+ years of experience in building high-performance, scalable mobile applications for Android and iOS. Strong expertise in Flutter, Dart, BLoC state management, Firebase integration, REST APIs, and clean architecture. Experienced in developing CRM and lead-management apps with features like authentication, push notifications, file handling, and native Android integrations. Passionate about writing clean, maintainable code and delivering smooth user experiences.

PROFESSIONAL SKILL

- Flutter & Dart
- BLoC State Management
- Dependency Injection
- Responsive & Adaptive UI Design
- REST APIs
- Native Android Integration
- Firebase Notification
- Postman
- Clean Architecture
- Performance Optimization
- Git Version Control
- Error Handling & Debugging
- Resolved complex technical issues and fixed critical bugs to ensure smooth application performance and stability.
- Mentored and supported interns/junior developers by providing technical guidance and code reviews.
- Collaborated with cross-functional teams and contributed to effective task management and timely project delivery.

WORK EXPERIENCE

Flutter / Internship
Global Garner Sales & Services - AHMEDABAD **Jan 2023 - Oct 2023**

- Completed an industrial training through college placement.
- Specializing in Flutter development. Designed and developed a college project mobile application using Flutter and Firebase, applying real-world concepts such as responsive UI, database integration, authentication, and structured app architecture.

Flutter Developer
BanasTech Private Limited - AHMEDABAD **Dec 2023 - Present**

- Developed and maintained cross-platform mobile applications using Flutter & Dart
- Implemented BLoC/Cubit for scalable state management
- Integrated REST APIs and handled JSON data
- Built responsive and reusable UI components
- Implemented error handling, logging, and debugging for production-ready apps

PROJECTS

Armee HRMS **April- 2025**

- Designed and developed a Flutter-based HRMS mobile application with features including employee management, attendance, leave approvals, payslips, notifications, and ticketing system.
- Implemented BLoC/Cubit state management and integrated REST APIs to ensure scalable architecture, smooth data flow, and reliable business logic.
- Built responsive Material UI with robust error handling, input validation, reusable widgets, and performance optimization for a stable production-ready app.
